CALCULATION ERROR

**Humanity at crossroads,
self-destruction or limitless future**

a publication of

**PLANETARY
ENGINEERING
GROUP** 

Description

16th November 2013, publication date of Calculation ERROR. In Warsaw will be the UN Summit of total failure.

A will say: We must do more to protect the climate.

B shall say: We are deeply in debt, we have no money

And my book will carry a new message to the world:

Calculation ERROR! With an earlier and more intense change to renewable energy and electric mobility, we would have today a much better situation.

Why are we in such a bad situation? Because the economic science has refused to answer since 4 decades the three most burning questions about the future of our civilization, which were raised in the 1972 Limits to Growth:

- 1.) Are alternative supply chains available for the same service?
- 2.) What are the possible future shortages and price developments of these supply chains?
- 3.) How do we switch from one supply chain to another before a shortage hits the economy?

Instead to research these 3 questions, economics thought only of their own dogma, that the perfect market solves all problems.

The refusal of Economics to use different facts and computational methods brings our civilization to the brink of the abyss.

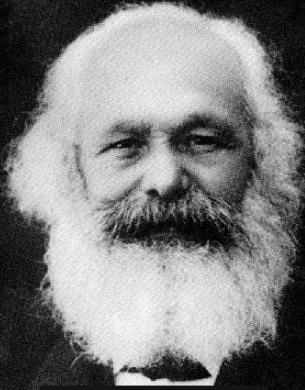

We need a new world view, a new approach for all our serious problems:

- * Peak Oil Gas Coal Uranium will be reached soon.
- * Climate Change
- * Many countries in crisis: trade deficit greater than oil imports.
- * The Lost Generation - youth unemployment.
- * Working poor - the pay is not enough to live.
- * Too little investment in the real economy.

Only with a new global movement, we can have a livable future. This is the book, to design this new view of the world to establish this new global movement.

Compared with 4 famous unwritten books

Das Kapital 2.0

How a new tax system steers capitalism towards the benefit of mankind

I have a Dream

A united humanity creating for many billion years a paradise on Earth

Denny Meltus

The Targets of Growth

A report of the Salzburg Club about the future of mankind

How uncontrolled tumor-like growth has to be converted to a purposeful growth to achieve a new durable civilization level

Thimo Sarhawin

Mankind terminates itself

How do we put our future at stake

Planetary Engineering Group Earth - future instead of self destruction

Headwords

Critique of economic science, economics, economy

Tasks of politics, criticism neoliberalism, fiscal policy, economic policy

Tax system reform, ecological tax reform

Social critique, meritocracy, achievement society

Against high unemployment

Future research, development and levels of civilization, developmental stages, levels of development

Climate change, melting permafrost, planet renovation

Peak-oil, oil exit, exit from fossil energy

Energy policy, renewable energy, photovoltaic, solar power, solar age

Solar architecture, plus energy house, heat pump

Settlement planning, Plus energy settlement, land use, solar construction land, land for energy

Ethics, the science of survival

Electric car, electric cars, electric vehicle, electric vehicles, electric scooter, electric scooters, electric mobility

The Limits to Growth

Economic growth, growth objectives, targets for growth

Emissions trading, environmental certificate trading, CO2 trading

Joseph Stiglitz, Economist

contra Flassbeck Heiner, Keynesianism

IEA, International Energy Agency

Fatih Birol, chief economist of the IEA, oil crisis warning

Solutions across the boundaries of disciplines

No single science can emerge with a solution to our problems today. All our problems are interrelated. Only a cross-sector research can bring solutions.

A new worldwide movement

This book is to establish a new worldwide movement. We have to end the all-out war against our own future. Be a part of this movement!

It's a fight for scientific leadership, ethics as the science of survival versus economics as the destructive cult responsible for the downfall of USA+EU.

It's a fight for public opinion leadership. This book is written against a multi billion EUR and US\$ industry to produce the public opinion for the people paying for it. But luckily, high concentrated truth is a weapon of mass destruction against paid lies.

It's a fight for political leadership. Politicians have to be more than very well paid entertainers delivering a very bad show during an election campaign every some years. We have to teach them what is expected from a politician.

We have to make the industry our allies. We need a strong industry for a high living standard for all and for a maybe necessary planet renovation.

We have to make the 99% our allies. There are no better plans to help the "lost generation", all the other unemployed people, the "working poor" and the declining middle class.

We have to make the 1% our allies. Economics omitted to tell them, that the total change to renewable-energy and electric mobility is the biggest investment business in the 21st century. In the shortage of a big game where everybody wins, they invented casino capitalism and all the games to redistribute from poor to rich.

We have to make all car drivers our allies. Only the change to electric mobility will preserve affordable mobility.

We have to make all environmentalists our allies. They have been the best allies of the old fossil industry with their "renounce and reduce."

Please be part of the community on <http://calculation-error.org> ready for actions.

This is my speech at the Gusi Peace Prize ceremony 2011:

Humanity is in a civilization jump since two centuries.

Before the civilization jump was only renewable energy, mainly biomass.

After the civilization jump will be only renewable energy, mainly sun and wind.

To start the civilization jump, by using fossil energy to boost the development was right, a necessary development.

Half-century ago, humanity reached space, reached the technology level - to fulfill the civilization jump

Phase out fossil energy - Phase in renewable energy, to have a high tech civilization - for the next some billion years.

But there is a deadly calculation error - The death calculation, that it's cheaper to succumb than to survive, that it's cheaper to destroy than to maintain.

Instead of reaching solar age, mankind is in an all-out war against the own future.

To correct this calculation error is my mission.

The Gusi peace prize is a huge boost - helping me to end this all out war against the own future,

ISBN 978-3-9503506-0-9

9 783950 350609

to bring humanity on the right way - the way to solar age, to fulfill my mission - Mission Earth

This is my book to expose this deadly calculation ERROR
